

# METAL ROOF RESTORATION

Extend, Restore and Cool Roofs.

## GET THE PROJECT DONE FAST WITH FABRIC-LESS ROOF COATING SYSTEMS

- Multiple product chemistries for project flexibility
- System bends and stretches with roof
- Less disruption for your business
- Highly reflective roof helps reduce heat transfer
- Can be quickly spray or roller applied

HIGHEST PERFORMING SYSTEMS. LOWEST APPLIED COST.

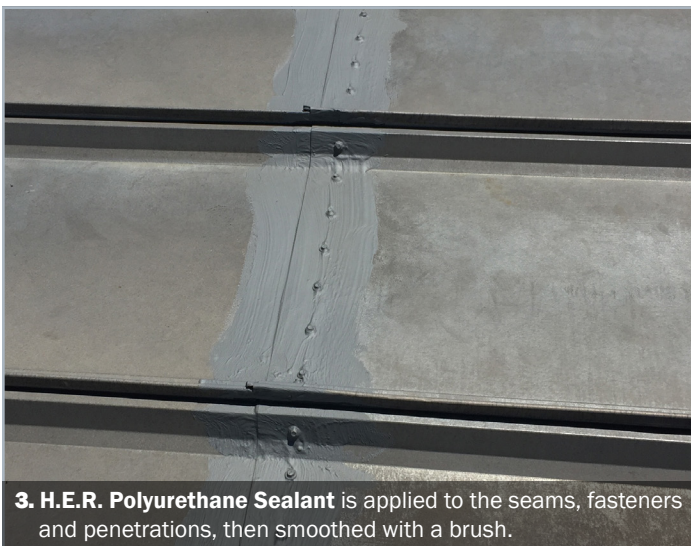

**1. Prepare the roof. Prep and clean the roof, removing dirt and debris.**

**2. Prime all rust with **ERSystems Acrylic Metal Rust Primer** or **Polyurethane Metal Rust Primer**.**

**3. **H.E.R. Polyurethane Sealant** is applied to the seams, fasteners and penetrations, then smoothed with a brush.**

**4. Apply 2 coats of **ERSystems Acrylic 1000 Plus** or the **Polyurethane 300 System**.**

## Why Choose a Metal Cool Roof Restoration System?

- Since fabric is not used on the vertical and horizontal seams; trapped moisture, air pockets and excessive installation labor are minimized concerns.
- Restoration costs may be as low as 20% of total tear-off and replacement costs; materials are easily applied by spray or rolling.
- Makes the inconvenience, risk and environmental implications of roof tear-off unnecessary.
- Restoration may be expensed, while roof replacement must be capitalized.
- ERSystems Metal Roof Restoration System has over 30 years of proven performance and is tested and approved by UL and FM Global.
- Repairs are fast and economical.
- Reduces future maintenance costs.
- 80 mils of system protection over problem seams, fasteners and around penetrations.
