Polyurethane Sealant

Fluid Applied

Versatile

Seal Fasteners

Seal Flashings

Stop leaks in one step with a liquid applied repair that conforms to any shape or form.

Solutions include:

- **Metal** (Curbs, Gutters, Seams, Fasteners, etc.)
- **Single-Ply** (PVC, EPDM, Drains, Scuppers, etc.)
- **Asphalt** (Smooth BUR, Modified Cap, and others)
- **Polyurethane Foam**
- **Concrete**
- **Wood**
- **Block/Brick**
- **Membranes**

**HIGHEST PERFORMING SYSTEMS.
LOWEST APPLIED COST.**

HER.

Polyurethane Sealant

Stop leaks with a fluid applied self-conforming polyurethane sealer

Avoid trapped moisture in fabric.

Fabric can trap moisture, which causes rusting and leaks.

- No fabric reinforcement required
- Reduce labor
- Easy to apply and brush
- UV stable
- Time tested since 1977
- One step application

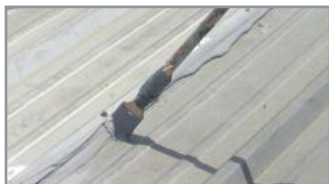

Traditional fabric "tenting" leaves space for condensation to accumulate.

HER forms a complete seal, eliminating the possibility of moisture accumulation.

Great for full metal roof restoration

Packaging

5 GAL PAIL • 2.5 GAL PAIL • 1 GAL PAIL • 20 OZ SAUSAGE • 10.1 OZ CARTRIDGE
